The symptoms of pancreatic cancer are often vague and may at first appear to be associated with other less serious and more common conditions.

**Symptoms**
- Abdominal pain
- Mid-back pain
- Jaundice (Yellow Skin or Eyes)
- Unexplained weight loss
- Loss of appetite, nausea
- Indigestion
- Changes in stool
- New-onset diabetes

**Risks**
- Age
- Being overweight
- Pancreatitis
- Smoking
- Diabetes
- A family history of pancreatic cancer

**Early Detection Saves Lives**

Pancreatic cancer has the lowest survival rate among all major cancers.

Every day more than 1,250 people worldwide will be diagnosed with pancreatic cancer.
